

AI FOR THE PEOPLE CENTRE

- RELEASING THE POTENTIAL OF AI

AI FOR THE PEOPLE

- ▶ Established at AAU in 2019
- ▶ Brings together and coordinates the university's many AI activities across the four faculties
- ▶ More than 140 people are affiliated with the rapidly growing centre as AI technologies penetrate an ever-increasing number of research areas and new areas of society

BROAD FOCUS

AI for the People focuses on technical AI as well as on the impact of AI solutions – on both individuals and societies, and how this should be regulated:

- ▶ Technical AI
- ▶ Applied AI
- ▶ Societal and human consequences of AI

COLLABORATION - Interdisciplinary and with the surrounding community

- ▶ [AI for Automatic Analysis of Legal Judgments](#)
- ▶ [AI for Satellite Communication](#)
- ▶ [Automatic Image Recognition](#)
- ▶ [Collaboration between AI Lund and AI for the People](#)
- ▶ [Urban Greening: Ultrasonics and AI for sustainable biodiversity in cities](#)
- ▶ [Tagging Coercion in eighteenth-century text](#)
- ▶ [AI for the Local Community](#)
- ▶ [Animal Behavioral Analysis Using AI](#)
- ▶ [AI for Optimizing Indoor Visual Comfort from Facial Analysis](#)
- ▶ [Predictive Analytics of Non-Compliance to Labour Norms](#)
- ▶ [AI & Ethics](#)
- ▶ [A Computational-Driven Discourse Analysis of AI](#)

SUPERCOMPUTER CLAUDIA

Provides AI services to researchers and students in hosting and processing huge amounts of data

Ability to conduct AI- and data-driven research with external partners in a secure, effective and GDPR-compatible way
